

ABOUT ENFOLD SYSTEMS

“ Our mission is to empower community-minded groups to collaborate and to communicate with the world.”

ABOUT ENFOLD SYSTEMS

Enfold Systems (Enfold) is the premier provider of Windows-integrated content management solutions. The company was founded in 2004 by Alan Runyan, who is also a co-founder of the open source Plone content management system and the Plone Foundation.

Enfold delivers systems tailored to meet the needs of business, government, education and nonprofit organizations based on Plone.

Our solutions range from departmental workgroups to high-performance websites, all of which enable you to more easily communicate and collaborate.

Our goal is to satisfy your content management requirements, while reducing the cost and risk of projects by integrating commercial software with best-of-breed open source technologies.

GLOBAL REACH

The Enfold team is comprised of experienced consultants and developers who are recognized leaders in the worldwide open-source community in both its talent and client results.

EUROPE
NORTH AMERICA
SOUTH AMERICA
AUSTRALIA

Headquartered in Houston, Texas, USA, Enfold Systems has built a partner network that supports its products and services around the world. Our global partner network provides you with consulting and support close to home.

OPEN SOURCE COMMUNITY

Through the open-source community, we share and contribute our knowledge and software to benefit others.

Enfold's clients receive tremendous value through our use of open source software. As key contributors to Plone we invest in, and encourage our clients to let us release software we develop to, the community.

SERVICES AND PRODUCTS

PRODUCTS

ENFOLDServer

Our version of Plone, optimized for Windows networks

Enfold Server is an enterprise Plone distribution for Windows, which enables active directory integration, log rotation, com integration, office document indexing, scheduled tasks to automatically backup/pack/rotate logs, ZEO Server/client integration and ability to fully utilize multiple processors.

ENFOLDDesktop

Empower Plone users with a familiar Windows desktop interface

Enfold Desktop is a shell-integration component for windows desktops. It enables Drag N Drop + Point N Click actions with Plone content. Users can right click to apply workflow and transition content instead of using a web interface. It also allows editing documents in a Plone site using the client native editor.

ENFOLDProxy

Make Plone faster and more secure with IIS

Enfold Proxy is a connector for IIS to efficiently speak with Enfold Server, Plone, or Zope. Out-of-the-box it provides a rich integration so that end users see an instantaneous response when browsing the website. The caching technology allows web pages to be served 500% faster than the default configuration.

ENFOLDEntrant

Use Plone for content management and the Web technology you already know

Entrant allows less hassle, more flexibility and better performance in delivering Plone content. Entrant delivers extensive search integrations and easier Plone adoption into organizations skilled in PHP, Perl, Microsoft .NET, or Java.

We deliver a full set of solutions to help organizations meet their content management needs. We believe in quality service and delivering systems focused on stability, scalability and return on investment.

SERVICES

With Enfold Systems' professional services group, the world's leading Plone experts empower your team to collaborate and to communicate with the world.

When your organization needs a high performance website, intranet or extranet, that many contributors can edit easily, Enfold's consulting services can help craft the right solution.
